

Job description:

NEXE INNOVATIONS INC. develops materials and technology for compostable single-serve packaging to confront the global problem of plastic pollution. We are seeking a qualified **Quality Assurance Manager** to join our team who can deliver effectively and on-time on the objectives of NEXE's production and operation-related initiatives.

We are looking for an QA Manager who is detail-oriented, exceptionally organized, able to manage complex systems, and who has excellent communication skills. QA Managers can expect to work with associated documentation, complete tasks alone and in teams, manage multiple inventories, and report to and advise company management.

NEXE is on a mission to replace everyday products with plant-based materials. Our work atmosphere is safety-focused, supportive, collaborative and performance-driven. We are committed to continuous improvement and the growth of our employees, with programs that support learning, engagement and career advancement. Are you ready to join a successful team where your contribution makes a difference?

Job overview:

- The QA Manager will be responsible for pre-operational inspections and on-line QC checks. The ideal candidate will have strong communication skills and have the ability to explain and inform individuals or groups of people on food safety practices and policies. Strong decision making skills and the ability to adapt in a fast paced environment is a must.
- 70% of the role consists of performing QC inspections on the production floor and in the lab, the other 30% is working with documentation regarding the QA system.

Responsibilities:

- Executes quality procedures such as monitoring of plant good manufacturing practices; performs inspections, calibrations, environmental, sanitation and pest control monitoring.
- Conduct inspection of in process and finished products for compliance to specifications and the completion of required paperwork.
- Conducts product shelf-life analysis and monitors compliance to shelf life standards
- Provides Food Safety training, including GMP training and other quality and food safety training needed to execute the quality management system.
- Implement the QA program through communication with production personnel in the facility.

- Sample testing & analysis, report writing, problem solving & trouble shooting of product quality issues.
- Ensure raw materials, manufacturing processes, plant environment and finished products meet established formulations and specifications.
- Assist in investigating product quality issues and report them to management.
- Other food safety and quality control related jobs as assigned by the Plant Manager.
- Promote a positive and professional relationship with CFIA, Management, and co-workers.

Qualifications:

- Completion of a post secondary education in a relevant discipline (e.g. Food Science, Food Technology/engineering, Microbiology,) is an asset.
- Minimum three years working experience in a related field (Food/Food packaging industry QA/QC).
- Knowledge & experience with implementing HACCP, GMP's, GFSI (SQF/BRC/FSSC 22000) is an asset.
- Excellent time management skills, well organized and attention to detail and high degree of accuracy in record keeping.
- Excellent written and verbal communication skills

Job Type: Full-time

Experience and Education:

- 5+ years working in Quality Assurance for Food and Beverage
- Degree, Diploma, or Certificate in Supply Chain or a related field
- HACCP Certified
